

DisSys Assignment 01

1. As per the assignment of DisSys course, you are required to prepare a case study on case studies on different applications of Distributed Systems and security issues in distributed systems.
 - (a) Mode of Submission: The students have to submit the case study in the required template (in .pdf as per the format shared separately) on Moodle (The link for the same will be shared lately). The submissions done in other mode will not be evaluated and marked 0.
 - (b) Please note, you should not directly copy from other source(s) or from any other assignments. Plagiarism will be checked and if found copied, will be marked 0.
 - (c) A maximum of 10 pages are allowed for the paper and must include the page numbers.
 - (d) The term paper must include the sections as per the template provided.
 - (e) The title of case study must be written using the InitCap format only.
 - (f) The evaluation scheme of the term paper is divided into the following sub-components:
 - Explanation of idea: 4 Marks
 - Follows the template: 4 Marks
 - (i) The number of pages allowed is 10 with page numbers in Arabic. In case, your paper exceeds the limit, 1 mark will be deducted.
 - (ii) Document prepared in the template provided.
 - (iii) Abstract (maximum 200 words allowed) failing which 1 mark will be deducted.
 - References in IEEE template: 2 Marks

Only references with citation in the report are allowed. Do not include the reference which you have not referred. Failing this condition deducts your mark by 0.5. Also, the references must not be any non- confirmative resources such as Wikipedia, geekforgeeks, etc.
 - (g) Date of Submission: November 15, 2022 till 1 pm.

The late submission will result in a deduction of 4 marks automatically, i.e., if a student submits the paper after the deadline, the grading will be done out of 6 marks (rather than 10 marks).
